LITTLE SPROUTS

INTRODUCTION

Communal facilities like IECD centers are a crucial resource as the support they provide may often take a holistic approach to the well-being and health of young children, covering a variety of wellness pillars, such as nutritional and educational needs, especially during the consequential early stages of childhood development (0-5 years old).

Our proposed intervention is a 12-month program aimed at stimulating early childhood development, enhance self-sufficiency and reduce childhood malnutrition with the introduction of urban gardens into selected, existing ECD centers throughout Namibia.

STATISTICS

Approximate number of ECD centers across Namibia: 2306

Only about 1 in 5 children 3 years and above attend ECD centers due to inadequate facilities.

TARGET IMPACTS

- ✓ Increase self-sufficiency by generating revenue from production & sales of crop yields, then re-investing profits into ECD programs
- ✓ Improve psychomotor, cognitive, & social skills, as well as nutritional and environmental awareness in children aged 0-5

ABOUT IMPACT TANK

- We are Namibia's first social impact venture builder, founded in 2020.
- Our projects focus on 3 thematic areas: Emerging Technology, Blue & Green economy and Indigenous knowledge.
- We aim to impact the lives of thousands of Namibians and inspire further action by the market.
